INTRODUCING  
OUR SELF SERVICE SOLUTION FOR  
DOCUMENT SCANNING &  
DEPOSIT

# SELF SERVICE DOCUMENT SCANNING & DEPOSIT

Meet our revolutionary solution for self service document submission, scanning & deposit, in a secure, fast and convenient way.  
It applies to:

**G2C**

Government (state or local) to Citizen services

**B2E**

Businesses' HR Departments to Employees

**B2C**

Private or public organizations to Consumers

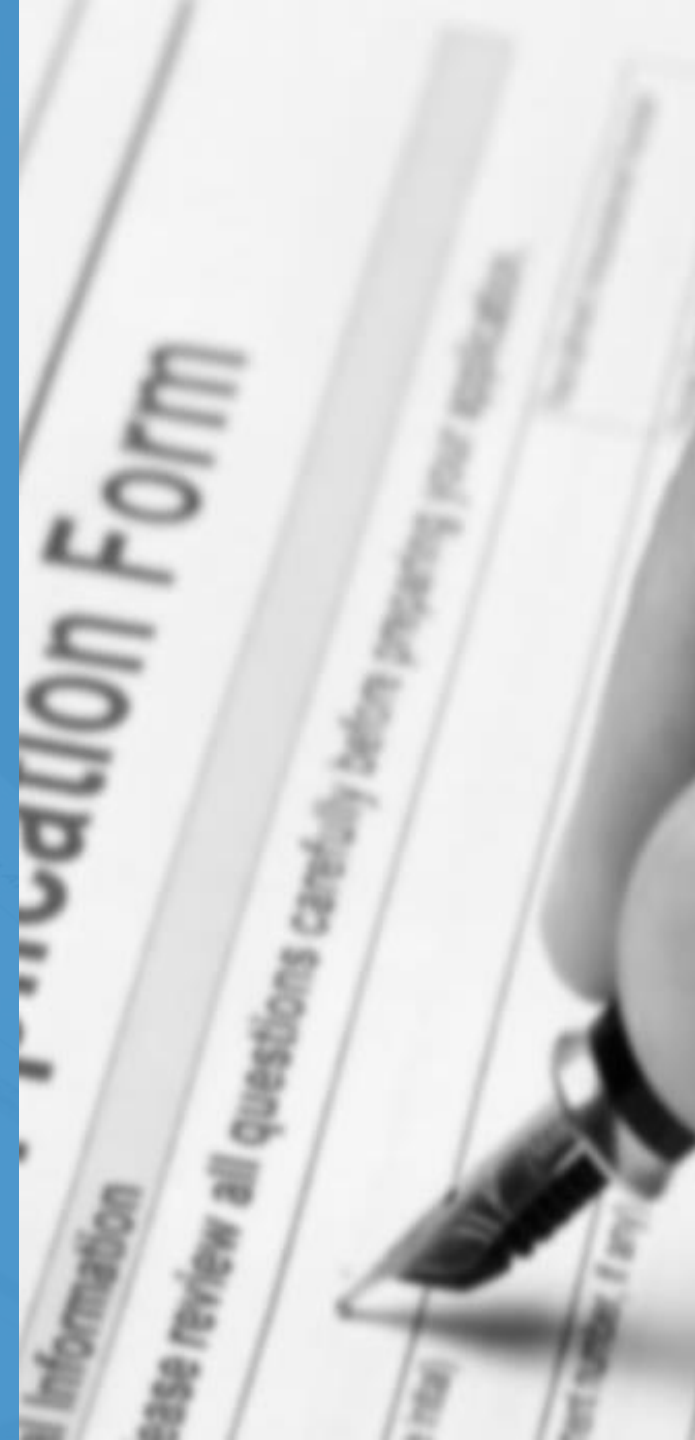

Educational Institutes towards the faculty and the students

# SELF SERVICE DOCUMENT SCANNING & DEPOSIT

Both end-users & organizations will benefit from using a self service channel, efficiently scanning and depositing documents. This solution:

- Allows end-users to be served over a wide, geographically distributed, low cost network
- Serves transactions any day & time (24x7)
- Minimizes service time
- Improves organization's productivity and image
- Kills waiting queues

# INTEGRATOR SELF SERVICE SOLUTION

ADSS SAD

Application Development Tools

Total Care Platform

Quick Start & Consulting Services

The solid base to kick off your project

Develop your application

A Kiosk specially designed for document scanning and deposit

The right tools to build a business application according to your needs

The ultimate software platform for remote monitoring & management of your installed Self Service terminals

Training and know-how transfer

# ADSS SAD HIGHLIGHTS

## User Identification

RFID/NFC Reader  
Card Reader  
Fingerprint Reader  
Touch Screen  
Metal Keyboard & Numpad

## Double side color scan

## Document Stapling

Custom designed stapling mechanism, adjusts and staples inserted documents

## Escrow Mechanism

stores up to 20 A4 documents and returns them upon cancellation

## Receipt Printing

for successful submission  
In A4 size

## Document storage

in safe box

- Document escrow mechanism for multiple document return on cancelation
- Vandal-proof keyboard & Numpad
- Hybrid Card Reader
- RFID/NFC Reader
- Fingerprint Reader
- Camera
- 2-point Security lock
- Industrial PC
- Speakers

\* depending on final configuration

# SUPPORTING MECHANISMS

ADSS  
SAD

SmartNET  
Framework

Total Care  
Platform

Services

→ **Mainboard:** Printed Circuit Board monitoring all sensors and driving all mechanisms.

→ **Document Detectors**

→ **Escrow:** Temporarily stores the A4 scanned sheets

→ **Stapling Mechanism:** Custom-designed subsystem for stapling A4 sheets before deposit

→ **Moving Mechanisms:** Two separate designs forwarding documents from the Scanner to the Escrow & from the Escrow to the Stapling Mechanism

→ **Aligning Mechanism**

→ **Stopper Mechanism:** Designed to stop and support sheets at the document exit

→ **Retracting Mechanism:** Electromechanical subsystem that retracts documents when forgotten at the Exit slot and stores them

# UNIXFOR SmartNET Framework

In order to fully develop your own application, SmartNET Framework provides you with all the necessary components to guarantee that it will run smoothly on ADSS SAD kiosks.

ADSS  
SAD

SmartNET  
Framework

Total Care  
Platform

Services

→ .NET Service Drivers (Installers + Documentation) for the following peripherals

- Document Printer
- Document Scanner
- Camera
- Hybrid Card Reader
- Sensors controller
- ADSS SAD Control Board
- Document Escrow
- Stapling Mechanism
- Storage Box

→ Device Testers (Installers + Documentation)

→ Device Emulators (Installers + Documentation)

→ Total Care Message Codes

→ Quick Start Services

## TOTAL CARE REMOTE MONITORING & MANAGEMENT PLATFORM

Remotely monitor, control  
and manage any size of kiosk  
network

Maximize operational  
availability & reduce cost  
and response time

- Collects real time status information for all connected terminals, servers, connected hosts, etc
- Provides online consumables availability
- Forecasts replenishment needs
- Enables remote investigation of issues and troubleshooting
- Automatically sends alerts through text messages or emails when critical events occur
- Distributes and applies software updates automatically, over the network
- Provides availability statistics, SLA compliance metrics and business performance reporting for the entire kiosks network
- Accessible from anywhere using any browser

# CONSULTING & DEVELOPER TRAINING SERVICES

Take advantage of our expertise. Minimize business application development effort & risk and build robust self service solutions.

## QUICK START SERVICES

- Training on the SmartNET Framework
- Unix for SmartNET Framework - Total Care communication
- Total Care integration with your application
- Sample application development

## ONGOING SERVICES

- Remote Consulting services and support
- Bug fixing & new releases on the SmartNET Framework

# COMPETITIVE ADVANTAGES

## We bring

- Deep subject matter expertise
- Battle-tested, Business-ready Solutions for multiple industries
- Business Solutions tailored to your needs
- Integrator Solutions with extensive consulting support
- Flexibility to accommodate unique market requirements
- Capability to accommodate small quantity orders at a cost effective pricing
- Option to customize kiosks and software to unique project specs
- Methodologies and best practices to the partnership

## We offer

- Partner Sales Enablement & Support (joint calls – customer demos)
- Technical Support know-how
- Product Warranties
- Second level support for Hardware and Software
- Maintenance Parts
